Market News
STOCK MARKET
 NEW YORK, June 25.—Unlike previous sessions this week, today's market showed a broad and sharp upward swing of prices.
 Gains of one to five points, to which an over-confident short interest made enforced contributions, were scattered throughout the list. Oils, rails, shippings, steels, equipments and miscellaneous issues, were impartially favored.
 Conspicuous strength was shown by Mexican Petroleum, General Asphalt, Baldwin, United Fruit, Atlantic Gulf, American Woolen, American Sugar, American Smelting, Tobacco, Sears-Roebuck, Reading and Southern Pacific.
 United States Steel added almost two points to its recovery from the low record of Thursday and affiliated issues were two to five points above recent minimum quotations. Realizing for profit made only slight impressions at the strong close. Sales 435,000 shares.
 Current news offered little expansion for the market's reversal, for most notices concerning trade and commerce again stressed conflicting conditions and the cautious attitude of buyers.
 Trading in bonds was moderate and irregular, both in domestic and international issues. Total sales (par value) aggregated 4,659,000.
 The clearing house weekly statement furnished no noteworthy features. Actual gains and discounts showed a relatively small decrease, considering the recent heavy liquidation. A cash contract of about \$20,500,000 still left a liberal margin of excess reserves.
WEEKLY STATEMENT
 NEW YORK, June 25.—Liquidation and professional pressure this week caused more losses and low records in the financial and commodity markets.
 Almost every rally in stocks was a signal for increased pressure and lower quotations, until many shares which figured in the table of averages were 75 to 200 points below maximum quotations of the war period.
 Attention was temporarily diverted from Mexican Petroleum and other speculative features by a break in United States Steel, whose heaviness was accompanied by more pessimistic reports from leading industrial centers.
 Save in a few cases, including the textile trade, the business outlook, as viewed by conservative authorities, showed no improvement. Slower corrections were reported by commercial agencies, with further contraction of buying power.
 Sharp declines in exports last month—in many instances a drop of 50 per cent as compared with May, 1920—had a vital bearing on banking institutions organized to handle post-war foreign trade and the pioneer organization of that character announced voluntary liquidation.
 Lowering of the British bank rate, despite adverse industrial and economic conditions abroad, hardly affected the international money market. All foreign exchanges were lower here with fewer dealings than any time since the extensive reaction in sterling bills.
 Domestic money rates eased. Traders expressed belief that local and interior banks would offer time funds more liberally in the year's third quarter.
